

# Tkachenko

# Denis

Front-end developer

## ABOUT ME

At the moment, my strength lies in developing **e-commerce** projects with custom CRM systems. My skills enable me to create responsive interfaces that are user-friendly for both the client and the customer. Additionally, my development experience allows me to **write clear and clean code**.

## PROJECTS

### TaskPro, Github-link

Task scheduler with convenient unctionality

**Role: Team Lead. Route developer, project deployment, background switching functionality and many other details**

### Sushka-store, Github-link

E-commerce project with custom CRM systems.

**Role: front-end developer. Implementation of routing, development of the main page, catalog, favorites, authorization, cooperation, placing orders, creating products within the CRM.**

### Fake-store, Github-link

Basic functionality of a standard online store with adaptive layout.

**Individual project.**
